*Office Memorandum* • UNITED STATES GOVERNMENT

TO : Chief, Administrative Services

DATE: 5 May 1951

FROM : Chief, Communications Division

SUBJECT: [REDACTED] Project Improvements

25X1A

25X1A

1. It is requested that arrangements be made for the performance of the following work [REDACTED]

(a) Procure a 2500 gallon fuel storage tank and bury three feet below the surface as per attached drawing PES-345. This tank shall be provided with a three inch filler line extending one foot above the ground and fitted with a return "L" having a screened opening. A buried half inch supply line shall be installed from the tank to the Generator Building, said supply line to clear the bottom of the tank by four inches and to be fitted with a foot valve. A buried half inch return line shall be installed from the Generator Building to the top of the tank. Both lines shall be made of copper and four foot lengths shall be left within the Building for connections to the diesel engines. These connections will be made by Communications Engineering Branch personnel.

(b) Remove existing tank and piping.

(c) Construct a full width extension of the Generator Building to a distance of 18 feet at the west (washroom) end of the Building as per attached drawing PES-345. Insofar as possible, this extension shall be similar in construction and appearance to the existing Building. A concrete floor is to be installed. Door and window positions are shown on drawing PES-345. This space is to be used for storage and will require no utilities other than the indicated lighting. The concrete housing shown on the drawing houses water supply lines from a well and is not to be disturbed in any way.

25X1A

2. The work covered in paragraph 1 above is of a routine nature and does not require the assignment of any classification. The association of this Agency with [REDACTED] Project, however, is classified Confidential, and it is requested that only suitably cleared contractors be used in connection with the work.

3. The estimated cost for the installation of the 2500 gallon tank is \$1300, which includes procurement of the tank, associated piping and the labor involved in burial. The cost for constructing the additional building is estimated at \$2200 including labor and material.
